

PROJECT UPDATES

Oct 2019

BOILERS

The new Weil-McLain boilers and burners have been installed; next steps are to fire up and boil off before being put into service.

PARKING LOT

The project is well underway with the completion of the sewer and electrical work. Excavation has taken place and concrete curb, sidewalk and drive approaches are being poured. The structural masonry pier work is done and brick work is nearing completion.

CGS

The Parish Center renovation for the expanded Catechesis of the Good Shepherd (CGS) Levels One and Two Atria spaces is complete and fall sessions are underway.

GYM GUTTER

The gym gutter replacement and clay tile repair has been completed and the main gym entry roof and gutters will be replaced next.

ORGAN

New organ construction is well underway. An architectural firm is working to create final drawings and specifications for the balcony.

CHURCH LIGHTING

LED lamps for the Church chandeliers have been installed.

CONCRETE WORK

Due to safety and aesthetic issues, the concrete Church ramp and Parish Office entrance walk and railings have been replaced. Failing railings were also replaced at the old school and main gym entrances.

SCHOOL

Ninety chrome books were ordered and the students have already been putting them to good use. In addition, investigation of LED lighting in all the classrooms and school window solution are in progress. The wireless upgrade work continues and a new Barracuda Firewall has been installed.
